Forecast for Tuesday 16 Nov 2021

Weather: Mainly dry with clear spells overnight then a bright start but increasing cloud brings outbreaks of rain and drizzle towards midday. The afternoon sees further rain at times. Becoming drier through the evening with some clearer spells developing.

Maximum wind: Southerly 10mph veering southwesterly 15-20mph by dawn then increasing 25mph for the afternoon, with gusts around 40mph over ridges and summits.

Chance of cloud free mountain/hill tops above 600m: Around 75% at first, and again in the evening, becoming close to zero by early afternoon in west and around 40% in east.

Visibility: Occasional cloud above 600-750m at first and again in evening, but periods or persistent cloud developing above 300-450m through morning, the cloud more occasional above 600m at times over eastern hills. Otherwise visibility very good becoming rather hazy in the afternoon and falling to just a few kilometres in drizzle.

Temperature: **Valleys:** Plus 5 or 6 Celsius at dawn rising to plus 11 or 12 Celsius by day.
At 600m: Plus 5 or 6 Celsius
Freezing level: Above the summits.
